

## INVESTOR BRIEFING AND FINANCIAL STRATEGY OVERVIEW

### Artè Park – Visionary Architecture Meets Sustainable Return

Artè Park is not just an architectural masterpiece — it is a strategic business initiative designed to generate long-term cultural, social, and financial value. Conceived by Maestro Santi Sindoni and supported by the JTV FOUNDATION and Fondazione Artè Etra, this project is managed under the financial and structural leadership of JT TRADECAPITAL LTD. Positioned in Wiltshire, UK, near the spiritual epicenter of Stonehenge, Artè Park uniquely combines high cultural relevance with tangible business potential.

### Investment Opportunity

Artè Park provides a rare opportunity for impact-oriented investors to participate in the creation of a global icon. The project's multi-functional structure — integrating museum space, amphitheater, digital art labs, luxury hospitality, botanical innovation, and educational institutes — allows for diversified revenue streams across:

- Ticketed cultural events and permanent exhibitions
- Commercial leases (retail, food & wellness)
- Hotel and culinary institute operations
- NFT and digital art curation and sales
- Corporate summits and private rentals
- Sponsorships, partnerships, and intellectual property licensing

### Projected Returns

Based on preliminary feasibility models, Artè Park is expected to reach operational break-even within 4–5 years of launch. Conservative ROI forecasts indicate:

- **IRR target:** 9–12% within 6–7 years
- **EBITDA margin post-break-even:** ~28–32%
- **Token appreciation potential:** aligned with asset-backed issuance

### Tokenized Financing via JTV (JTV)

The project is strategically anchored to **JTV (JTV)** — a regulated utility and asset-backed token issued on the Solana blockchain. JTV acts as a financial gateway and accelerator for the project. Key features:

- Investors may contribute via direct token acquisition (JTV)
- Utility rights include access to exclusive events, governance functions, and early-stage art drops
- Tokenized fractions represent proportional access to revenues generated from NFT sales, commercial usage, and intellectual property

This innovative structure ensures **transparency, traceability, and liquidity** — features typically absent from traditional real estate or cultural investments.

### Capital Deployment and Governance

Investor funds will be allocated across core construction, smart infrastructure, interior completion, technological integration, and artistic content. A dual-audit model (on-chain and third-party governance) will be implemented to ensure full compliance and fiduciary oversight.

### **Why Invest in Artè Park**

- A legacy asset in a high-tourism zone (Wiltshire, UK)
- Partnership with global foundations and public institutions
- Integration with blockchain and next-gen cultural tech
- Hybrid monetization model (physical + digital)
- Media-ready narrative and iconic design

Artè Park represents a profound opportunity to **generate ROI while participating in the birth of a new cultural paradigm.**
